

SPiCā SC-30

SPICA

SC-30 Speaker System

The new SPICA SC-30 is a "bookshelf" type speaker offering exceptional levels of price vs. performance. Made possible by recent advances in driver technology, it incorporates features uncommon in its price range. Although housed in a conventional rectangular enclosure, the SC-30 gives near phase-aligned performance, and has the same neutrality, transparency, and spectacular imaging and soundstaging performance that is the hallmark of SPICA products.

FEATURES

- > One cubic foot sealed enclosure solidly built using 3/4" MDF, and finished on all sides.
- > Eight inch custom built bass-mid driver uses "humbucking" magnet geometry for low magnetic leakage - great for video systems.
- > One and one-half inch (1.5") polypropylene cone tweeter delivers exceptional high frequency performance and extended frequency response (-3 db @ 27kHz!).
- > Computer-optimized 3rd order crossover network for smooth driver blending and good dispersion characteristics.
- > Crossover incorporates woofer impedance correction, making the SC-30 an easy load for any amplifier/receiver to drive.
- > Input terminals are five-way binding posts.
- > Internal wiring by Straight Wire.
- > Frequency response (-3dB), 54 Hz - 27 kHz.
- > Recommended power of 25 - 100 watts
- > Dimensions : 10" W x 23" H x 11.75" D
- > Weight : 28 lbs. net, 31 lbs. gross (each)
